

Instructions for the Local Government Ag/RBI Project Cost Share Program

Program Description

MARBIDCO strives to have a close working relationship with local and regional economic development offices recognizing the important role that these offices can play in fostering the retention and growth of Maryland's existing and emerging agricultural and resource-based businesses. To lend support to local rural business development efforts, as well as to provide guidance to county and municipal economic development officials, MARBIDCO has created a grant program to match rural business development investments being made by local governments and rural regional development councils.

For MARBIDCO to participate in an economic development cost share project with a unit of local government or a regional council the following criteria must be met:

- 1) MARBIDCO will consider a project cost-share request from a local economic development office if the project fits within MARBIDCO's statutorily established economic development profile. Any project or activity funded by MARBIDCO must assist in some fashion Maryland's farming, forestry, or seafood industries (including potentially agri-tourism activities). Businesses that produce foodstuffs or other goods that grow in the soil or in the water, and the packaging and/or value-added processing and marketing of any such products, are generally eligible targets of MARBIDCO's programs and services. Water and air quality improvement projects that contribute to business sustainability may also be eligible.
- 2) MARBIDCO's participation in the cost share project cannot exceed that of the local government. The only exception to this requirement is that a county designated as "One Maryland" jurisdiction (i.e., a severely economically distressed county) may qualify for a match from MARBIDCO of up to 200% of the county's contribution. (Put another way, MARBIDCO will not pay for more than 50% of an eligible project's cost, with the exception that in One Maryland counties MARBIDCO may pay up to 67% of a project's cost.)
- 3) If a project directly benefits an individual farmer or rural business owner, then the farmer or business owner must be willing to make a financial contribution to the project. The amount of a business owner's equity contribution can vary depending upon the individual circumstances. Projects that do not directly involve individual business owners (such as industry feasibility studies) may not require private equity contributions.

Grant Terms and Conditions

Maximum Amount of Grant:	\$10,000 (And no more than a total of \$10,000 per county in FY 2011, unless in a "One Maryland" County.)
